PROFILE

A passionate Web Developer with an eye for detail and a love for all things digital. I specialize in developing visually stunning and intuitive web experiences that engage and delight users. My toolkit includes HTML, CSS, JavaScript, TypeScript, and a variety of backend technologies and databases like Node.js, Express.js, NoSQL, and more. I use these tools to build responsive, scalable, and efficient web applications that are as stylish as they are functional. When I'm not tinkering with code, you can usually find me exploring new design trends and experimenting with cutting-edge web development techniques.

EDUCATION

Bachelor Degree in English
Universum International College
2017 - 2020   **VIEW** 🖱
